MUSTANG SOFTWARE INC.

# The Mustang Software Online Product Family.

Mustang Software Inc. takes great pride in presenting its family of BBS and communications products. Since our inception in 1986, we have sought to become an industry leader in the PC telecommunications world. Today, we rank as the premier single-source supplier of Bulletin Board Systems and related software worldwide. We offer a broad range of online products that includes communication software, single and multi-user BBS programs and E-Mail connectivity products. Every month, more than one million callers get online by logging onto a Wildcat! BBS. We connect the world with functional, easy-to-use communications tools.

Mustang Software has made a commitment to stay at the forefront of the BBS industry. Our advanced product features reflect leading industry trends such as Windows compatibility, RIP graphics, and access to the fast-growing information superhighway. To ensure that our products meet real online needs, our Software Engineers routinely incorporate many of the features and suggestions recommended from the valued customers who have invested in our products.

We are especially proud that our products have not only made a contribution to worldwide communications, but have also created an industry. Today, Fortune 500 companies increasingly recognize Bulletin Board Systems as a valuable communications tool – both inside and outside their organizations. Our professional communications software products are the most full-featured in the industry. And we continue to pioneer new innovations which keep our customers ahead of the competition.

We invite you to see the many ways Mustang Software is connecting the world.

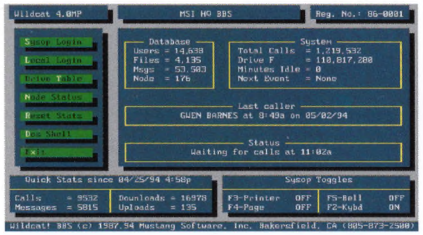
# Announcing The Next Generation Of Online Pro

## The World's Most Popular BBS Software.™

Mustang Software unveiled the first Wildcat! BBS in 1986. Since its initial release, Wildcat! has emerged as the world's most popular Bulletin Board System (BBS) software with more than 30,000 Sysops worldwide. A centralized, PC-based information system, Wildcat! is packed with more intelligent features and value than any other BBS product available. Callers can send, receive and view messages and files, access external applications, and chat 24 hours a day. This full-featured software is available in four configurations for the hobbyist, small business and Fortune 1000 corporations, and allows simultaneous access from one to 250 users. Since Mustang offers complete BBS solutions, Sysops don't need to go searching for third-party add-on products.

### Wildcat! Single Line

Our economical and easily-installed flagship product requires only a telephone line, a personal computer, and a modem to begin posting messages and routing files around the



world. Wildcat! 4 maintains its dominance in the BBS market by giving you greater flexibility and power. Intelligent features include:

- A .GIF thumbnailer that lets your callers download and preview a sample of multiple .GIF files in one combined bitmapped file;
- An industry first, spell-checking editor to allow your callers to audit their text before posting their messages;
- RIPscrip graphics to provide your callers with a graphical user interface (GUI) and allow them to navigate the BBS with their mouse;
- A free-form menuing system that gives you the ability to create a custom menu structure and command system;
- Support for over 32,000 message conferences and file areas to give your BBS plenty of room to grow;
- Sysop-defined language files that allow your callers to select the BBS language interface of their choice;
- wcDRAW BBS display screen editor that lets you customize the look of your BBS interface;
- The ability to perform all BBS Sysop functions from remote so you can maintain your data while you're on the road.

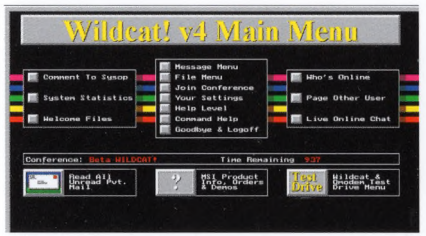
These product features are just a few of the reasons why Mustang Software maintains its leadership as the Number #1 BBS supplier worldwide. Our liberal upgrade policy allows Sysops to start with our Single Line version and trade it in later for full credit to any of our MultiLine products.

### Wildcat! MultiLine 10

This MultiLine package extends the functionality of our base product by supporting up to 10 simultaneous users through your Local Area Network (LAN), multitasking environment or combination. The MultiLine 10 allows concurrent use of database utilities without interrupting your online user activity, and adds a powerful online chat conferencing system.

### Wildcat! MultiLine 250

Designed for corporate environments, Wildcat! MultiLine 250 extends MultiLine 10 features by supporting up to 250 concurrent users. Your LAN users have all of the E-Mail, messaging and file functions of dial-up users, so you can increase corporate productivity, in-house communications and customer access.

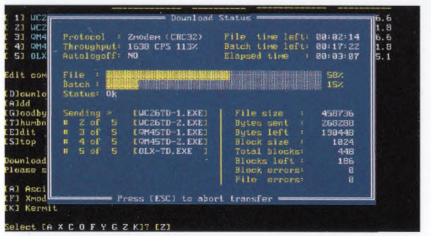


### Wildcat! MultiLine Platinum

Wildcat! was the industry's first BBS software to offer Intelligent DigiBoard support. MultiLine Platinum continues this heritage by offering serial and FOSSIL support to an already proven DigiBoard interface. With Wildcat! MultiLine Platinum, each 486 workstation can support up to eight high-speed modem connections with the Intelligent PC/8e DigiBoard, and, when combined with your LAN, up to 250 total connections.

### Wildcat! BBS Suite™

Only Mustang could revolutionize the industry by producing the first "BBS Suite". The Wildcat! BBS Suite includes our top-of-the-line Wildcat! MultiLine Platinum BBS software with the wcPRO database utility, wcFAX on-demand server, wcGATE Internet/Novell MHS mail gateway, and wcCODE development tool kit to give you the ultimate BBS solution.



Wildcat! BBS Suite processes statistics and creates graphs on Wildcat!'s activities; allows your customers to receive product literature and troubleshooting tips via fax; attaches your message databases to the Internet and MHS-compatible E-Mail products; and gives you all the power to fully customize Wildcat!'s interface and create custom BBS applications, all in one economical yet powerful package. The BBS Suite is the ultimate tool for the professional Sysop — you!

## An Exciting Array Of Add-On Packages.

Our powerful collection of add-on utilities will enhance any Wildcat! 4 BBS. Developed by the same Software Engineers that brought you Wildcat! 4, these utilities have the same easy-to-use interface as the rest of the Wildcat! 4 family, and are fully supported by Mustang Software, giving you a single-source for all your BBS needs.

### wcPRO Utilities For The In-Control Sysop

wcPRO provides powerful user, message and file database maintenance capabilities. You can create custom reports with more than 20 pages of online statistics, create command macros for nightly batch processing, and export BBS data into other formats for external applications.

# ucts.

Our relational database handling makes managing your BBS callers, files and messages quick and easy. The wcPRO utilities package also includes our fax-on-demand processor, wcFAX, so your callers can request data online and receive product literature, registration forms, and price list documents via their fax.

## wcGATE Internet/MHS Messaging Gateway

A sophisticated messaging gateway, wcGATE enables your callers to send and receive Internet E-Mail and news right from your BBS without having to know a single Internet command. Built-in support for satellite connections means your callers can have a constant flow of Internet information at their fingertips. wcGATE also allows you to transfer BBS messages to your company's favorite MHS-compatible E-Mail system. Outside salespeople and remote offices can leave messages on the BBS and have them directed to the appropriate mail box on your LAN using Novell's Message Handling Service.

## wcCODE Custom Online Development Engine

wcCODE allows you to develop custom applications to enhance or change Wildcat!'s operation. BASIC-like syntax combined with an Integrated Development Environment makes it easy to use the more than 200 built-in functions, including access to Wildcat!'s internal operations. wcCODE allows you to customize Wildcat! and write applications which will work on any Wildcat! 4 BBS. Easy-to-read manual and sample applications like our wcLIST BBS Lister and an on-line order system are included.

## Professional Communications Software.

The QmodemPro Professional Communications Software family fits the needs of today's active modem user and offers the most popular terminal emulations, file transfer protocols, and interfaces. Designed to access all major E-Mail

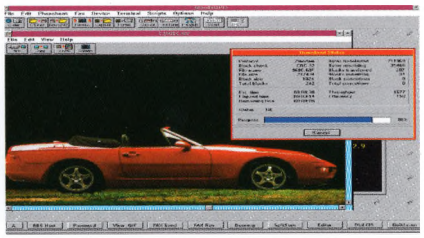
**QmodemPro**

and BBS systems, QmodemPro is easy to install and use, yet includes some of the most sophisticated communications technology features available. To help match your personal needs, Mustang Software has developed three versions of QmodemPro to work with today's popular operating systems and network environments.

## QmodemPro For Windows

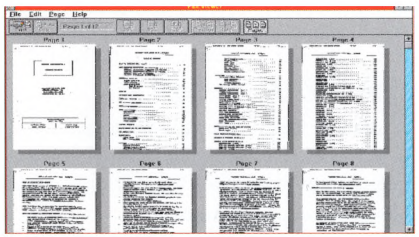
QmodemPro for Windows makes the most of the Microsoft Windows operating system with its graphical user interface, tool bar, macro keys, mouse support, dialing directory icons and background operation. Dialing, connecting and downloading are as easy as a click of the mouse. You can become more productive by taking advantage of the Windows operating system and putting QmodemPro in the background while you use your favorite Windows word processor, spreadsheet or database program.

QmodemPro for Windows also takes full advantage of your fax-modem by combining



both data and fax communications in one integrated package. You can send and receive text and graphics, view multiple page and thumbnail versions of your received documents, and even fax directly from your other Windows applications. QmodemPro's host mode allows you to receive both fax and data calls; an incoming fax call starts QmodemPro's fax mode while a data call starts the mini BBS.

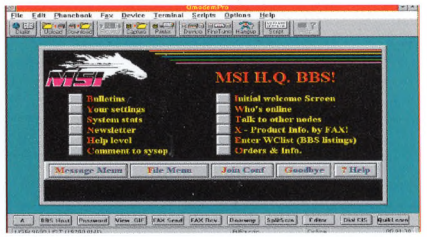
QmodemPro for Windows is the first communications software to take advantage of the multimedia capabilities of today's computer. RIPscrip emulation has become the defacto BBS graphical user interface and QmodemPro allows you to navigate RIP BBSs with your mouse. QmodemPro's .GIF viewer lets you watch .GIFs, CompuServe weather maps and other bitmapped files as you download them. Integrated sound card support allows you to attach .WAV sound files to specific actions in QmodemPro so it can remind you when you've connected to your favorite online system or your file transfer is complete.



Qmodem for Windows is also available in a Network 5-Pack including support for NASI/NACS and network installations.

## QmodemPro For DOS

QmodemPro for DOS was the first commercial communications software to support Remote Imaging Protocol (RIP) graphics. Using QmodemPro for DOS, you can view RIP graphics, including icons, buttons and animation on any RIP supporting BBS. Items can then be



selected with the click of a mouse button or keyboard key.

Pull-down menus, context-sensitive help and mouse support make QmodemPro for DOS one of the easiest programs you'll ever use. You'll appreciate features such as the off-line mail reader and the full range of file transfer protocols. The QmodemPro for DOS phonebook offers a range of convenient features – group entries, multiple phone numbers per entry, and links to the Off-Line Xpress mail reader.

Power users have a selection of advanced features, too – a powerful script language, more than a dozen of the most popular terminal emulations, the ability to send a FAX using any Class 1 or Class 2 compatible FAX modem, and much more.

QmodemPro for DOS's integrated mail reader, Off-Line Xpress (OLX), lets you read and reply to E-Mail from Bulletin Board Systems, MCI mail, and CompuServe E-Mail and forum mail. E-Mail messages may be sent to your favorite on-line service, and routed to the Internet, MHS gateway or FAX numbers. You can use the internal editor to write and reply to E-Mail messages, or you can use the text editor or word processor of your choice. The built-in spelling checker features a 124,000 word dictionary, and works with internal or external editors. What this means to you is less time spent reading and replying to mail on a costly on-line service or BBS.

## We Take Customer Service Seriously.

Technical support for the entire Mustang Software family of products is only a phone call away. We have developed a comprehensive Customer Access program to ensure that our customers have fast access and the best support possible. Our customers especially appreciate our live voice support capability, provided between 9:00 a.m. and 5:00 p.m., Pacific Time. BBS support is also available from our corporate headquarters in Bakersfield, Calif. International customers can access any of our MSI SupportNET echo conferences around the world. Technical support for Mustang products is also offered via CompuServe, GEnie, and America Online.

## Connecting The World.

As the information superhighway emerges, and the world of telecommunications expands into new, exciting areas, Mustang Software will continue to provide its leadership in these dynamic environments. We're connecting the world with useful products, drawn from the real-world needs of our customers and our years of experience in this challenging new industry.
